**clerk maxwell's electromagnetic theory1**) - constants had no connexion with any other phenomena, the di electric constant and the magnetic permeability can be measured by means of statical experiments, so that, at least in certain simple cases, we can deduce the optical properties of a substance from wholly different data. it was found that in the new theory the **10. maxwell. darrigol (2000), chap 4. - site disabled** - 10. maxwell. darrigol (2000), chap 4. james clerk maxwell (1831-1879) 1873. treatise on electricity and magnetism. ... is the cause of electric and magnetic phenomena." ... not bring it forward as a mode of connexion existing in nature, or even as ... **meaning for modern electrical engineering** - electric currents create magnetic fields laid the foundation of ... «i propose now to examine magnetic phenomena from a mechanical point of view, and to determine what tensions in, or motions of, a medium are capable of producing ... bring it forward as a mode of connexion existing in nature, or even as that **15. the advent of the electron. hunt (1991), chap 9** - made up of discrete electric nuclei or centres of radial twist in the medium."
