
Field Detection Technologies Explosives Yin Sun

field detection technologies for explosives - field detection technologies for explosives morphix technologies explosives chemical detection kits in an emergency knowing the threat can make all the difference ... **introduction to drugs and explosives detection** - technology transition workshop outline

- existing technologies for detection
- detection of illicit substances in the form of particle residues or "trace"
- detection of illicit substances in the form of "vapors"
- biological detectors
- instrumental detectors

•conclusions field detection of drug and explosive odor signatures using pspme-ims introduction to drugs and explosives ... **explosives detection technology barringer instruments gc** ... - orn1 evaluated the performance of explosives detection technologies. this verification statement provides a ... explosives detection technology — barringer instruments, gc- ... technology description . the gc-ionscan is a fully transportable field-screening instrument that combines the rapid analysis time of ion mobility spectrometry (ims ... **ion mobility spectrometry for the detection of explosives** - with explosives abuse, the detection of illicit explosives is currently an area of major research interest. several broad categories of detection techniques are important, including imaging methods such as x-ray based technologies, the use of trained canines, and trace chemical detection utilizing various "sniffer" technologies. **site characterization and monitoring technologies** ... - principles of field-portable technologies for the measurement of explosive residues such as rdx and tnt are varied and include: gas chromatography with ion mobility spectrometer orthermoionic detection and flow-through immunoassay techniques with fluorescence detection and surface plasmon resonance. **standoff explosives detection technology demonstration program** - the dhs science and technology directorate (s&t) initiated the standoff explosives detection technology demonstration program (sotdp) in march 2007. this is a multi-year research and development program (through 2013) designed to accelerate the development of explosive countermeasures—standoff technologies, concept of operations (conops), and ... **analysis and detection of explosives - nist** - "the field recovery of explosive residues using solid-phase microextraction followed by chromatographic analysis" proc. spie-int. soc. opt. eng., 1999 . 3576 (investigation and forensic science technologies) 1823 . andrasko, j. "detection of organic explosives by solid phase microextraction" **science & technology to counter improvised explosive devices** - international field work, focus groups, qualitative and quantitative analysis of countermeasures framework ... -spectroscopic and trace detection technologies ... for standoff and non-contact detection of trace amounts of explosives 20. c-ied response/defeat program goals: initiate, ... **technology demonstration plan evaluation of explosives** ... - this technology demonstration plan has been developed to describe the verification of field analytical technologies for the determination of explosives compounds in contaminated soil and groundwater. technologies from barringer instruments (gc-ionscan) and research international inc. (fast 2000) will be evaluated. **sensors and systems for the detection of explosive devices** - z. bielecki, et al.: sensors and systems for the detection of explosive devices... single energy x-ray systems operated at airports use electron energies of 120 kev. they provide good resolution pictures to detect weapons with metal elements. in the case of explosives placed behind or within items characterized by a higher atomic number, the **trace contraband detection field- test by the south texas** ... - trace contraband detection field-test by the south texas specialized crimes and narcotics task force david w. hannum and gary shannon prepared by sandia national laboratories albuquerque, new mexico 87185 and livermore, california 94550 sandia is a multiprogram laboratory operated by sandia corporation, **the author(s) shown below used federal funds provided by** ... - hand-held commercial thermo-redox explosives detection system from scintrex figure 11. portable commercial gc/saw explosives detection system from electronic sensor figure 12. hand-held commercial expray field test kit for explosives detection from mistral figure 13. portable commercial gc/ms explosives detection systems from constellation **department of homeland security (dhs) contact: james** ... - department of homeland security (dhs) contact: james murday, dc office of research advancement . 202 824 5863, murday@usc . summary and index . this document provides succinct insights into the various dhs funding opportunities for university research, with special attention to changes anticipated in fy2017. **chapter two innovative mine detection systems** - vative mine detection technologies, objective expert judgment is required to interpret the available data on detector performance. without such judgment, it is easy to be misled. for example, many of the existing field tests have been conducted in environments in which confounding factors were minimized, yielding high probabili- **introduction to the technology of explosives - mallpdfsfo** - field detection technologies for explosives - google books result introduction to the technology of explosives paul w. cooper and stanley r. kurowski introduction to the technology of explosives is a clear and concise survey€ explosives engineering - paul w.
